**Racquetball play on 21'W
courts is now sanctioned
by the International
Racquetball Federation!**

**DOUBLEPLAY Moveable Glass Walls by A Best Enterprises
can convert your courts from racquetball to squash**

The International Racquetball Federation recently sanctioned the use of 21' (6.4M) wide courts with unfinished floors, making it now possible to play both racquetball and squash on the same court. This is a growing trend in facility design in the United States and Sports Unlimited is proud to partner with A Best Enterprises utilizing their patented DOUBLEPLAY moveable glass wall system to accommodate the growing demand. The wall is supported in the vertical position using expanding scissor arms and locked in place using heavy duty slide bolts. A removable tell-tale is quickly and easily installed and removed on the hit wall. Sports Unlimited recognizes this as a tremendous opportunity to grow both sports world-wide. Please direct inquiries by completing the attached questionnaire and sending it to Secretary General Luke St. Onge at the International Racquetball Federation: lstonge@internationalracquetball.com
